

Feto Fantastiku "Water Conflict"

Conflict (Re)Solutions

Antonio and his family live next door to Jose and his family and they share one pipe for their water. They always steal each other's water, and every day they shout at each other.

I need to stop them before someone gets hurt.

I need water for myself, my garden and my animals.

I need water to wash my clothes, the dishes and to bathe my children.

See, the result is you both need the same thing. You both need water. Now we need to look for a solution where both of you will be satisfied.

If you want to solve a problem you need to understand each other's needs.

Win - Lose Solution (+/-)

If Antonio takes all the water from Jose...
Antonio wins-Jose loses
Only one person is satisfied.

Lose - Win Solution (+/-)

If Jose takes all the water
then Antonio won't have any water...
Jose wins-Antonio loses
Only one person is satisfied.

Lose - Lose Solution (-/-)

If Antonio and Jose keep on fighting over
water, they will destroy their relationship
for the future.
Antonio loses-Jose loses.
Both are not satisfied.

Win - Win Solution (+/+)

Antonio and Jose make a schedule
for the water. Antonio can use it
in the morning to fill up his tank
and Jose can have it in the afternoon.
In the dry season when there is not
enough water, they both take equal
amounts.

Impact on Antonio: Antonio wins.
Impact on Jose: Jose wins.
Both are satisfied!
